## MINISTRY OF TRANSPORT AND COMMUNICATIONS

### Meteorological Department

*New Delhi, the 12th June 1958*

*Memorandum regarding the probable amount of monsoon rainfall in 1958*

Previous weather conditions over certain parts of the world enable us to form an estimate, within somewhat wide limits, of the monsoon rainfall of India during the period June to September. These predictions aim to pass a statistical test of 80 per cent success, or, in other words aim at being correct four times out of five on the average over a long series of years.

The data used are given in section 2 below; these are followed by notes on the relevant inferences that may be drawn from them.

### 2. Data

**Java**—The monthly rainfall departures from October 1957 to February 1958 were —68 per cent, —28 per cent, +13 per cent, —20 per cent and +10 per cent respectively.

**Equatorial pressure**—Pressure was in defect by .48 mb. at Port Darwin in March to May and by .03 mb. at Seychelles in February and March; and was in excess by .58 mb. at Djakarta from January to April.

**South Rhodesia**—Rainfall from October 1957 to April 1958 was in excess by 96.5 mm.

**South America**—Pressure departures were as follows:—

|            | Buenos Aires    | Cordoba   | Santiago (Chile) |
|------------|-----------------|-----------|------------------|
| April 1958 | .. .. +2.00 mb. | —1.20 mb. | —0.80 mb.        |
| May 1958   | .. .. +0.67 mb. | —1.33 mb. | —0.53 mb.        |

**Upper winds in m.p.s.**—Bangalore, April, 6 Km.—The northerly component was —0.7.

Calcutta, May—The easterly component was —5.6 at 4 Km. and —3.8 at 2 Km.

Madhosagar, March 2 Km.—The easterly component was —5.0.

### 3. Inferences from the information

For the Peninsula—taken to consist of Bombay State, Madhya Pradesh (excluding Madhya Bharat, Bhopal and Vindhya Pradesh areas), Mysore North, Coastal Mysore (excluding South Kanara), Telangana and Coastal Andhra Pradesh—the available factors found to be of most importance are, in the order of decreasing reliability, Bangalore upper winds, South American pressure, Calcutta upper winds at 4 Km., Java rain and South Rhodesia rain. Of the factors, Bangalore upper winds are very unfavourable, South Rhodesia rain and South American pressure are slightly unfavourable, Calcutta upper winds are indifferent and Java rain is very favourable. The statistical analysis indicates that there is a four to one chance that the monsoon rainfall in the Peninsula during June to September 1958 will lie below 106 per cent of the normal.

For Northwest India—taken to consist of Jammu and Kashmir, the West Uttar Pradesh, the Punjab (I) (including Himachal Pradesh and Delhi) and Rajasthan—the factors used are, in the order of decreasing reliability, Equatorial pressure, Madhosagar upper winds, Calcutta upper winds at 2 Km., South American pressure and South Rhodesia rain. Of these South Rhodesia rain is unfavourable, Equatorial pressure, South American pressure and Calcutta upper winds are indifferent and Madhosagar upper winds are very favourable. The statistical analysis indicates that there is a four to one chance that the monsoon rainfall in Northwest India during June to September 1958 will lie above 91 per cent of the normal.

4. *Summary of Forecast*

The factors are somewhat conflicting and all that can be said is that the monsoon rainfall during June to September 1958 is likely to be not far from normal both in the Peninsula and in Northwest India.

#### CORRIGENDUM

Recruitment of one Assistant Surgeon, Class I (Male) for Gun and Shell Factory Hospital, Cossipore under Ministry of Defence. In partial modification of item No. 12 of Commission's advertisement No. 15 which appeared on 12th April 1958 it is notified for general information that the post is to be filled in Cordite Factory at Aruvankadu and not at Gun and Shell Factory at Cossipore as previously advertised. Closing date extended to 15th July 1958. Other conditions remain unchanged.

D. C. SEN  
Deputy Secretary  
Union Public Service Commission
